PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in Artificial Intelligence with a strong foundation in programming, web technologies, and problem-solving. Skilled in Python, Java, HTML, CSS with hands-on experience in developing academic and personal projects. Interested in Artificial Intelligence, web development, and building practical software solutions. Quick learner with a keen interest in exploring new technologies and improving technical skills.

EDUCATION

Vignan's Institute of Information Technology <i>B.Tech in Computer Science Engineering (AI) – CGPA: 8.54</i>	Visakhapatnam, AP 2023 – 2027
Tirumala Junior College <i>Intermediate (MPC) – Percentage: 93.4%</i>	Visakhapatnam, AP 2021 – 2023

EXPERIENCE

Symbiosys Technologies <i>AI Developer Intern (Present)</i>	Visakhapatnam, AP May 2026 – Present
– Developing an AI Resume Screening and Job Matching Portal to automate resume analysis and candidate-job matching. – Building features for resume parsing, skill extraction, job recommendation, and candidate ranking using AI techniques. – Collaborating with the development team to design and implement scalable backend functionalities and user-friendly interfaces.	

TECHNICAL SKILLS

Programming Languages: Python, C, Java
Web Technologies: HTML, CSS, JavaScript
Databases: MySQL, PostgreSQL
Tools & Others: Git, GitHub, REST APIs, VS Code

PROJECTS

Crypto Vision <i>Firebase, CoinGecko API, Material UI</i>	Website
– Built a real-time cryptocurrency tracking dashboard displaying live prices, market cap, volume, and 24h change for 250+ coins using the CoinGecko API. – Designed a responsive UI with Material UI, featuring a trending coins carousel, paginated coin listing, instant search, and dark/light theme toggle. – Implemented secure user authentication and personalized watchlists using Firebase Authentication and Cloud Firestore for real-time data synchronization.	
AI Meeting Intelligence System <i>Python, Gradio, Whisper, Ollama</i>	Repository
– Developed an AI-powered meeting analysis application that converts meeting audio recordings into accurate transcripts using Faster-Whisper speech recognition. – Integrated a local Large Language Model (Ollama) to generate concise meeting summaries, extract action items with priorities, and identify deadlines from discussions. – Built an interactive Gradio-based interface with automated audio preprocessing, enabling users to upload meeting recordings and view transcripts, summaries, action items, and deadlines in a single workflow.	

ACHIEVEMENTS

- Participated in multiple Ideathons and Hackathons, collaborating with teams to develop innovative AI and software solutions for real-world problem statements.
- Solved 100+ coding problems on LeetCode and CodeChef to strengthen problem-solving and programming skills.
